# Generators

ESE ensuring all your standby power needs are fulfilled

Power availability and security is achievable by using standby generators. ESE can provide these generators and more.

With over 50 years combined experience in the industry ESE can ensure you receive the most up to date, expert advice and provide the latest equipment tailored to meet your specific needs.

Losing power for even a few hours can mean thousands of pounds in lost revenue to your business. ESE supply standby generators powerful enough to keep your entire operation going. Offering the full turnkey solution from supply through install and commissioning to ongoing servicing. Keeping your business running 24/7.

**Client:** Blue chip manufacturing company

**Project:** Client wished to install a generator to power their premises at times of power outage and to guarantee no downtime in production due to power loss.

**Problem:** The client operated a myriad of large machinery in his factory that placed large shock loading on the mains and was unsure of what size of standby generator to employ.

## Technical Solution:

We carried out a full survey and assessment of the installed equipment, analysing how and when it was being operated. Using this information we were able to determine the most suitable generator for the clients current and future needs. Having the correct size of generator meant that initial costs were kept to a minimum and removing the need for an upgrade of the machine in the foreseeable future.

## Package:

1250kVA generator was installed and commissioned by ESE with continued support in maintenance and servicing as per OEM recommendations.

## What makes us different from other suppliers?

- Being an independent company ESE are able to tailor equipment to the clients specific needs. Minimising commercial and environmental impact.
- We cut out the uncertainty of determining what size generator is best for you.
- We provide a full range of generator ratings so no matter your needs, we can provide the solution.
- We can provide bulk tanks and ancillary items.
- Full installation and commissioning.

**ESE offer a full range of standby generators from 30kVA to 1250kVA.**
